To Whom It May Concern:

The TOTT Retreat Conference of November 3,4,5, 2017 hosted by YuFoundation.org was to combine the scientists, medical doctors, chefs, and nutritionist with the general proactive public and medical and live science students to share the state-of-the-art science and food on the metabolic approach to cancer disease and Alzheimer's Disease. This event was meant to be not only as a professional meeting but combining food and nutrition, so the public and young students can share and learn from all of us with credibility, legitimacy with no commercial interests but to serve the public.

Without permission from the YuFoundation.org or Dr. George Yu MD, Twin Labs and their former CEO, Naomi Whittel, W Products and Hays Production, obtained all the speakers' private email as well as their private cell phone numbers. They claimed that they were invited to interview all of us and that was not the truth. As they interviewed many of us, I thought that it was a planned activity for the YuFoundation.org digital seminar to be spread worldwide. After we all discovered that there was a violation, I and other speakers "Revoked" our agreement with Hays production. I believe Naomi Whittel and group interviewed us as potential infomercial for future ketone products for weight loss. I am also upset that I was videotaped without any compensation or knowledge that this would be used for commercial gain by Twin Labs and the other companies involved in this videotaping and feel that I have been damaged as well.

Even when YuFoundation.org notified speakers of the uninvited commercial entity violation without permission, and I revoked permission for Naomi Whittel and the companies involved to use the videotape of me, she continued to contact me to further a "relationship" with the speakers and still claimed that she was "invited" to come to the conference. I feel that **this is a violation of my privacy.**

Sincerely Yours,
